Enjoy the choice and quality of the mouse leader

Nobody knows mice like Logitech. After making more than 300 million mice, we offer the greatest choice for comfort and performance with sculpted shapes, gentle curves that fit your hand, ambidextrous designs, easy-scrolling wheels, and extra buttons you can use for time-saving shortcuts.

Our cordless mice free you from cables that catch, tangle, and limit mouse movement. Advanced digital radio technology means there's no need to create a clear path, or even to point the mouse at the receiver. Get reliable performance in a six-foot range, even on desks crowded with books, cups, and piles of paper.

Our optical technology allows you the freedom to work where you choose with a mouse that rolls across desks, chair arms, and almost any other surface. It records motion optically, without a ball or rollers, so there are no moving parts that wear down or have to be cleaned and no need for a mouse pad.

Exceptional keyboards from the input device experts

Logitech offers a range of comfortable split-key and standard corded and cordless styles. Work the way you want with cordless keyboards and cordless desktops, which combine a keyboard and mouse. USB keyboards include a USB hub and two ports built into the keyboard so you can easily connect extra peripherals.

Put the Web and multimedia control at your fingertips.

ducts that let you stay... in tou

At the touch of a button (and with an Internet connection), you can access the Internet, go to top Web sites, check e-mail, search with your choice of search engines, or launch applications with the touch of a key. Play CDs, DVDs, MP3, and Windows® media files. Mute and change volume using convenient one-touch controls.

Work with smooth, precise trackballs

The Logitech family of cordless and corded trackballs combines an advanced pointing technology with innovative choices for comfort. Save time with an easy-scrolling wheel and buttons you can use for one-click shortcuts. Try one and you'll feel the difference.

Our patented Marble® sensing technology uses an optical tracking system in place of all the mechanical moving parts that record motion in standard trackballs. It eliminates the need for frequent cleaning, and provides maximum precision, reduces wear, and ensures smooth tracking, even if the ball gets dirty or scratched.

Leading cameras make high-quality Internet video a snap

Try Logitech® QuickCam®, and you'll quickly see why it's the leading name in Internet video cameras for most Windows and Macintosh applications. With easy installation, 30-bit full-color video capture, and the software you need to edit video and images, attach them to e-mail messages, and have face-to-face video meetings, you can create professional

ıch with your world™

videos, send still photos over the Internet, and keep in touch with family and friends.

Logitech's exclusive VIDEC™ compression technology enhances your video quality with faster frame rates and larger frame sizes. As a result, the QuickCam® videos are smoother and more true to life when you play them back.

Game controllers that offer unmatched realism

Logitech has the gear you need to win: a mouse built for gaming, gamepads, and the award-winning WingMan® family of joysticks and steering wheels. Aggressive designs feature eight-way hat switches, and programmable non-slip rubber buttons, wheel-mounted paddle shifters, and realistic pedals.

Revolutionary FORCE® feedback technology gives you unmatched realism. Sit back and let your instincts take over with smooth joystick motion and steering wheels that respond immediately.

Speakers you have to hear to believe

Discover exceptional sound from high-quality multimedia speakers to a full theater-like quality sound system. Sleek, attractive designs fit easily on desktops, bookcases, and entertainment centers.

Logitech®

Logitech® desktops are combinations of award-winning peripherals that help businesspeople, home users and gamers increase productivity, comfort, or fun with attractive products engineered to work together.

Start with a comfortable mouse or trackball. Then add a speaker system, camera, enhanced keyboard, and depending on your needs, a joystick or other game controller, until you have built a desktop that fits the way you work or play.
